PROFESSIONAL SUMMARY

Information Technology professional with over 15 years of experience in corporate environments, with a solid background in infrastructure and support and, in recent years, expanded responsibilities in Analytics & BI, IT service and asset management, SAP/AMS, and process automation.

I currently work as a Senior IT Infrastructure Analyst in a multidisciplinary environment, combining operational support with the implementation and continuous improvement of corporate solutions. My experience includes infrastructure, data analysis and KPIs, service management, SAP demand follow-up, automation, and continuous improvement initiatives.

I am a problem-solving and process-improvement-oriented professional, able to work across technology, operations, and business, contributing both in hands-on technical activities and in the technical leadership of initiatives, while interacting with multiple teams and business areas.

CORE SKILLS

Analytics & BI: Power BI | SQL | Power Query | ETL | Data Modeling | Data Warehouse | Microsoft Fabric | Excel
ITSM & ITAM: GLPI | IT Service Management | IT Asset Management | Service Catalog | SLA/OLA | Automated Inventory | KPIs

Infrastructure: Windows Server | Linux | Active Directory | VMware | Hyper-V | Networking | FortiGate | Backup | Microsoft 365 | CCTV

Systems & Automation: SAP | AMS | Power Automate | n8n | RustDesk | Process Automation | Azure | GCP

Management & Governance: Project Management | ITIL | COBIT | PMBOK | Scrum

Languages: English - Intermediate | Spanish - Intermediate

PROFESSIONAL EXPERIENCE

Senior IT Infrastructure Analyst | Valgroup PE | JAN/2018 - Present

Key areas of responsibility: Infrastructure | Analytics & BI | ITSM/ITAM | SAP/AMS | Automation

Analytics & BI

- Development and continuous improvement of corporate Power BI dashboards and KPIs for operational and management monitoring and decision support;
- Data modeling, transformation, and consolidation from SAP, SQL databases, spreadsheets, and other corporate data sources;
- Development of data automation and integration solutions using the Microsoft ecosystem, including Power Automate, OneDrive, and Power BI, with user-based information access control.

ITSM/ITAM

- Led the implementation, evolution, and ongoing support of GLPI as the corporate IT Service Management and IT Asset Management platform;
- Structured the service catalog, forms, support groups, SLA/OLA, business rules, Active Directory integration, data migration, and service indicators;
- Implemented agent-based automated inventory, centralizing the management of multiple IT asset categories and improving visibility, traceability, and control of the technology estate.

Infrastructure & Operations

- Support and continuous improvement of corporate environments involving servers, virtualization, networking, security, Microsoft services, and infrastructure demands across business units;
- Technical leadership in the deployment of RustDesk on-premises as a controlled and centralized corporate remote access solution;
- Acted as the local technical interface for infrastructure and support demands, working jointly with the responsible teams.

SAP/AMS & Process Improvement

- Work in SAP/AMS as an interface between business areas, internal support teams, and consulting partners, monitoring backlog, incidents, prioritization, and demand evolution;
- Development and improvement of processes and automations to reduce manual activities and increase operational traceability.

Software Developer | Accenture do Brasil | JUL/2017 - JAN/2018

- Development and maintenance of solutions using COBOL and IBM Integration Broker, including process mapping and work in an Agile environment using Scrum.

Mid-Level Support Analyst | Indústrias Reunidas Renda S/A | APR/2008 - DEC/2016

- Corporate infrastructure and support activities, including server and network administration, backup policies, and end-user support. Participated in the SAP implementation project, supporting activities related to the technology environment and operations.
